AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claim 1 (currently amended): An appearance protective case for card-like computer peripheral equipment, comprising:

a sheet member including a draw-processed sheet member treated with coloring or marking; and

a transparent or translucent cover case; wherein

the sheet member includes an upper portion and three side portions;

each of the upper portion and the three side portions of the sheet member is connected to one another by rounded joint portions; and

the sheet member is fitted into the cover case such that the sheet member extends in close contact with an inner surface of the cover case.

Claim 2 (original): The appearance protective case according to Claim 1, wherein the sheet member includes a decorative film comprising resin.

Claim 3 (original): The appearance protective case according to Claim 2, wherein the decorative film comprises a transparent film having a rear surface treated with coloring or marking.

Claim 4 (original): The appearance protective case according to Claim 2, wherein the decorative film has a front surface treated with coloring or marking.

Claim 5 (original): The appearance protective case according to Claim 1, wherein the sheet member comprises paper.

Claim 6 (original): The appearance protective case according to Claim 1, wherein the sheet member comprises a metal sheet.

Claim 7 (original): The appearance protective case according to Claim 1, wherein the cover case and the sheet member are firmly fixed to each other.

Claim 8 (currently amended): An appearance protective case assembly for card-like computer peripheral equipment, comprising:

- a frame having a groove formed along at least one side thereof;
- a sheet member including a draw-processed sheet member treated with coloring or marking; and
- a transparent or translucent cover case; wherein
 - the sheet member includes an upper portion and three side portions;
 - each of the upper portion and the three side portions of the sheet member is connected to one another by rounded joint portions; and
 - at least one of the three side portions of the sheet member is inserted into the groove of the frame; and
 - the transparent or translucent cover case and the frame are firmly fixed to each other so as to sandwich and hold a portion of the sheet member, including said at least one side.

Claim 9 (original): The appearance protective case assembly according to Claim 8, wherein the sheet member comprises at least one flange at the front thereof such that the flange is sandwiched and held by the cover case and the frame.

Claim 10 (original): The appearance protective case assembly according to Claim 8, further comprising a circuit board, wherein the circuit board is sandwiched and held by the appearance protective case and the frame such that the sheet member and the frame lie in contact with opposing surfaces of the circuit board.
